Hello Susan,

I hope the council found it helpful for me to show up to last night's meeting?
Could you send me an electronic copy of Glencore's responses that you shared last night.

Thanks,
Mike

Subject: RE: Tonight's City Council Meeting

Mike –

The questions from Council are as follows:

1. Does the CFAC site qualify for the Superfund alternative approach?
2. If so, is the Alternative Approach a faster and better method than the traditional NPL/Superfund approach?
3. What are the advantages of the Alternative approach?
4. What are the drawbacks of the Alternative approach?
5. Who makes the decision as to which approach is used? (guessing EPA) Is there public comment/input on this approach?
6. If the alternative approach is selected and Glencore/CFAC "walks away" after testing is completed, what happens? Does EPA then have to start the NPL process all over or does it get listed and Superfund procedures started?
7. We were led to believe that the site was already listed on the NPL – please provide clarification on the process and where it currently stands?
8. Please provide any information you believe to assist in clarifying the information in the press and presented at the Jan. 21st meeting.

You may find that there are follow up questions when you get answers to these questions,

Susan

Subject: Tonight's City Council Meeting

Hi Susan,

Chad Campbell of Senator Tester's office informed me that the City Council may still have some questions in regards to the NPL and the Listing process. He asked that if it would be possible to attend the City council meeting and I let him know I could but wanted to be sure the City Council wanted this. Do you know if the council would like me to attend? I can make it but, I would need to know so I can make the trip. If you would I would need the time and location.

Please advise.

Thanks,
Mike
